**Q1. Reading Comprehension: -**

**Read about endangered animals.**

An animal is called an endangered animal when there are not many of its kind left. It needs immediate protection to prevent its disappearance from earth. If measures are not adopted, then the animals can go extinct. Extinct animals are those animals which have not been seen in the wild for the last 50 years. Endangered animals are at a high risk of becoming extinct.

Many animals including mammals, reptiles, birds, insects and fish are in danger. Blue whales, great apes, snow leopards, sea otters, loggerhead sea turtles are some of the endangered animals. The population of the giant panda has also reduced. Do you know that there are less than 1000 giant pandas living in the wild?

There were more than 1,00,000 tigers on earth, now there are less than 7,000 alive. Unfortunately, Bali, Caspian and Javan tigers have already gone extinct. The South China tiger is on the verge of extinction. Poaching, pollution and habitat loss due to deforestation and global warming are common causes of making animals endangered.

**Answer the questions given below:**

- 1) Define endangered animals.
