Class – VI

'Recycle Your Trash Or Trash Your Earth'.

Waste management is essential in today's society. Due to an increase in population, the generation of waste is getting doubled day by day. Moreover, the increase in waste is affecting the lives of many people.

Dear Students,

It is summer vacation time, a time to relax as well as fruitfully occupy yourself in various scholastic and co-scholastic areas. Keeping this in mind, your teachers have painstakingly designed interesting Projects/Assignments for you which need to be completed during summer vacation. This would encourage in-depth learning, strengthen concepts and prepare ground for improved academic output. The parents are requested to motivate and lend support (minimum possible) to their children and ensure that they complete the given work well in time and to the best of their ability. Your encouragement can actually make a huge difference to the ultimate learning outcomes of these projects. We would be happy if parents encourage their children to work on their own.

We look forward to your co-operation.

Note: Any activity/ project assigned should bear the name of the student, class, section, roll number and the session. The written work should be done in the respective subject notebook if nothing has been mentioned.

English

With the right equipment, turning garbage into garden gold is a cinch! Make a video showing yourself making *Compost*. Shoot any 2-3 ways of making compost at home. Also, you have to explain the different ways step by step along with the contribution of compost in various aspects of our environment. The video should be of 2-3 mins.

Use various transition/sound effects.

Find any app (play store) to join different shots together for your film-project.

Keep a check on the resolution of your video.

Can take some bins/pots & kitchen wastage for the purpose.

Research & plan well before shooting the video.

Don't forget to mention the number of days, the various methods take to make compost.

Social Science

Sources of Waste can be broadly classified into four types: industrial, commercial, domestic, and agricultural. Take any one type of waste and explain the various methods through which you can recycle the waste.

- (Prepare on comment sheets, use art sheets for pictures and diagrams). Make it look attractive.
- The project report should include the following heads:

Introduction, Content (Waste, Types of wastes, how is waste generated? Steps to be taken to manage waste), Conclusion.

Computers

Make a PowerPoint Presentation containing ten slides at least on Waste management and Disposal. You can collect the matter from Internet. The first slide must contain Student's name, Class, Subject and Topic of the presentation. You can use pics, audio, video or even animation clips to make your presentation effective. You are also suggested to use default properties of MS PowerPoint (like Paragraph setting, Animation, Transition etc.) to make it striking.
